S 85767 Stocks of Grains

in All Positions

U. S. DEPT. OF AGRICULTURE
NATIONAL AGRICULTURAL STATISTICS SERVICE

AUG 4 1970

Release:

July 23, 1970

CURRENT SERIAL RECORDS

3:00 P.M. EDT

STOCKS OF CORN, SOYBEANS, SORGHUMS, DOWN
OTHER GRAINS ABOVE YEAR AGO

Declines in stocks of corn and sorghum grain more than offset relatively sharp increases in oats and barley, and total feed grains (corn, oats, barley and sorghum grain) at 77.0 million tons were down 3 percent from a year earlier, according to the Crop Reporting Board.

Stocks of all wheat were 8 percent above a year earlier, with durum wheat stocks nearly double last July 1. Rye stocks were a third higher than a year earlier. Holdings of soybeans were down 11 percent, but flaxseed stocks were more than double a year earlier.

Old crop carryover of all wheat on July 1 totaled 880 million bushels, 8 percent more than a year earlier and the largest since July 1, 1964. Farm holdings at 305 million bushels were exceeded only by the record high July 1, 1969 stocks of 328 million. Off-farm stocks of 575 million bushels were 17 percent above the previous year. July 1 stocks in all positions indicate disappearance during the crop year--July 1, 1969 to June 30, 1970--of 1,397 million bushels compared with 1,297 million bushels a year earlier, and 1,408 million two years earlier. Of the total stocks on July 1, the Commodity Credit Corporation owned 300 million bushels of old crop wheat, and had loans outstanding on another 443 million.

Old crop durum wheat stocks in all storage positions on July 1 totaled a record high 77.4 million bushels, sharply above the 41.2 million on hand a year earlier. Farm stocks at 59.7 million bushels were record high and double a year earlier. Off-farm stocks of 17.6 million were 52 percent above the previous year. July stocks show a disappearance of 70.1 million bushels in the crop year ended June 30, 1970, compared with 82.6 million a year earlier.

Old crop rye stocks in all storage positions on July 1 were 21.3 million bushels, one-third more than a year earlier. Farm stocks are 2.9 million bushels, compared with 2.0 million last year. Off-farm holdings, at 18.4 million bushels, are up 32 percent. Indicated disappearance during the April-June quarter is 3.3 million bushels, compared with 4.0 million a year earlier. The Commodity Credit Corporation owned 16.2 million bushels of total old crop rye stocks on July 1, and loans were outstanding on another 1.4 million bushels.

Corn in all storage positions on July 1 totaled 1,923 million bushels, 7 percent less than a year earlier and 12 percent less than July 1, 1968. Off-farm stocks of 520 million bushels were 11 percent less than a year earlier, and farm holdings at 1,403 million bushels were down 6 percent. Indicated disappearance from all positions during the April-June quarter was 1,067 million bushels, compared with 973 million during the same quarter a year earlier. The Commodity Credit Corporation owned 267 million bushels of corn stocks on July 1, and had loans outstanding on another 651 million bushels.

Old crop oat carryover stocks in all positions on July 1 totaled 489 million bushels -- up sharply from the 375 million last year and are the largest for this date. Off-farm stocks totaled nearly 145 million bushels compared with 100 million last year. Farm holdings of nearly 345 million bushels were up 25 percent from a year earlier. Disappearance during the April-June quarter was 184 million bushels, compared with a disappearance of 177 million a year earlier. The Commodity Credit Corporation owned 105 million bushels of old crop oat stocks on July 1, and had loans outstanding on another 192 million bushels.

Old crop barley holdings in all storage positions amounted to 232 million bushels on July 1, 1970. This is 16 percent above a year earlier and highest for the date. Of total old crop barley stocks, the Commodity Credit Corporation owned nearly 54 million bushels, and CCC loans were outstanding on another 97 million bushels. Off-farm storages totaled 100 million bushels, 18 percent more than a year earlier. Farm stocks at over 132 million bushels were 15 percent more than last year. North Dakota and Minnesota accounted for nearly 70 percent of the U. S. farm stocks. Total disappearance during the April-June quarter, at 94 million bushels, was 11 million more than a year earlier.

Sorghum grain stored in all positions on July 1 totaled 348 million bushels, 10 percent less than a year earlier. Off-farm stocks totaled 279 million bushels, 8 percent less than 1969. On-farm stocks were 17 percent below July 1, 1969. The April-June disappearance was 158 million bushels, compared with 157 million a year earlier. The Commodity Credit Corporation owned nearly 170 million bushels of the total stocks of grain sorghum, and had outstanding loans on another 64 million bushels.

Soybean stocks in all storage positions on July 1, 1970 totaled 403 million bushels, 11 percent below a year earlier. Off-farm stocks of 325 million bushels were 3 percent above a year ago, but farm stocks at 78 million bushels were down 45 percent. On July 1 the Commodity Credit Corporation owned 157 million bushels of soybeans, and had loans outstanding on another 147 million bushels.

July 1 stocks indicate a disappearance during the period, September 1969-June 1970, of 1,038 million bushels from a supply of 1,441 million bushels. During the September-June period, approximately 610 million bushels were processed for oil, about 371 million bushels were exported and about 49 million bushels to seed the 1970 crop.

Old crop flaxseed stocks in all positions on July 1, 1970 totaled 22.0 million bushels -- 12.2 million bushels above a year earlier, a 125 percent increase. Off-farm stocks at 17.4 million bushels accounted for 79 percent of the total and were more than double the 7.7 million bushels a year earlier. Farm stocks at 4.7 million bushels were also more than double year-earlier holdings. The Commodity Credit Corporation owned 15.3 million bushels of the old crop stocks and had loans outstanding on another 4.0 million bushels. July 1 stocks indicate a disappearance of 24.2 million bushels for the year ended June 30 from a supply of 46.2 million bushels (carryover of 9.8 million bushels plus 1969 production of 36.4 million bushels). Crushings are estimated at 14.4 million bushels and exports at 5.7 million bushels for July 1, 1969-June 30, 1970. About 2.2 million bushels were used to seed the 1970 crop.
